

CHILDREN'S CAR SEAT SAFETY

- **Is my car seat installed correctly?**
- **Can I turn my child around forward facing?**
- **Does my 8 year old fit properly in the adult seat belt?**

If these are questions that you are wondering - just give me a call. My name is Jeff Durkee and I am one of your neighbors here in Post Oak Square and I am a Nationally Certified Child Passenger Safety Technician. You know - those people that you go to in order to make sure you have your car seat installed properly!

I volunteer my services with Cobb County several times throughout the year and thought I would offer the same to all of my neighbors. If you would like to have me inspect your installation, teach you how to install your seat, check to make sure that it is not on a recall list, or if you just have questions about where and how your kids should be sitting in your cars - I would be happy to help you out.

An inspection can take anywhere from fifteen minutes to an hour depending on the number of seats and kids you have and the issues that I might encounter. In the end - I will teach you how to install your seats so you can do it right every time.

If you would like to set up a time - give me a call on my cell at 404-643-6436.
